

1. Identification of the Material and Supplier

Supplier Name	Tranzmile
Address	1262 Boundary Road, Wacol, Queensland 4076
Telephone	(07) 33 444 156
Fax	(07) 33 455 195
Emergency	0419 167179
Email	sales@tranzmile.com
Web Site	www.tranzmile.com
Use(s)	Hydraulic Oil
SDS Date	16th February 2016

2. Hazards Identification

NOT CLASSIFIED AS HAZARDOUS ACCORDING TO SAFE WORK AUSTRALIA CRITERIA NOT CLASSIFIED AS A HAZARDOUS GOOD BY THE CRITERIA OF THE GHS CLASSIFICATION

Signal Word	Not Applicable
Pictograms	Not Applicable
Hazard Statements	Chronic Hazard to Aquatic Environment – Category 3
	H412 Harmful to aquatic life with long lasting effects
Precationary Stateme	ents
Prevention	P102 – Keep out of reach of children
	P103 – Read label before use
	P273 – Avoid release into the environment
Response	Not Applicable
Storage	Not Applicable
Disposal	P501 – Dispose of contents/container in accordance with local, regional, national and

International regulations

3. Composition/Information on Ingredients

Ingredient	Formula	CAS No.	Content	GHS
Phosphorodithioc acid, O, O-diC1-14- alkyl esters, zinc salts	Not Available	684649-42-3	<1%	Not Classified
Ingredients determined to be nonhazardous	Not Available	Not Available	>99%	Not Classified

4. First Aid Measures

Inhalation	If inhaled, remove affected person from contaminated area. If you are providing assistance avoid exposure to yourself, where appropriate PPE. Apply artificial respiration if affected person not breathing. Seek medical assistance.
Skin	Wash contact areas with soap and water. Remove contaminated clothing and launder before reuse. If product is injected into or under the skin or into any body part, regardless of the appearance of the wound or its size the individual should be evaluated immediately by a physician. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment with the first few hours may significantly reduce the ultimate extent of injury.
Eyes	If in eyes, hold eyelids apart and flush continuously with running water for at least 15 minutes. If irritation occurs, seek medical assistance.
Ingestion	Rinse mouth out with water. If swallowed, do not induce vomiting. If vomiting occurs lean patient forward or place on left side head down position to maintain open airway and prevent aspiration. For advice, contact a Poison Information Centre on 13 11 26 (Australia Wide) or a doctor and seek medical assistance.
PPE for First Aiders	Wear overalls, chemical goggles and nitrile gloves. Use with adequate ventilation. If inhalation risk exists wear organic vapour/particulate respirator. Always wash your hands after assisting. Wash contaminated clothing and other PPE after use.
First Aid Facilities	Eye wash facilities and safety shower should be available.

4. First Aid Measures Cont.

Most important symptoms and effects caused by exposure

Chronic Contact with the skin may aggravate existing skin conditions such as demattiks. Advice to Doctor Treat symptomatically as the product is hydrocarbon based. If worthing has accurred after ingestion, the patient needs to be monitored to ensure the product has not been aspirated into the lungs. 5. Fire Fighting Measures Extinguishing Media Dry agent, carbon dioxide or foarn. You can spray down furnes from fire using a waterspray. Prevent contamination of drains or waterways. Unsuitable Media Do not use water jet directed at fire or residual material that may be burning as water may/will cause splattering on hot residue as this product will foot on water. Hazchern Code None Allocated Advice to Fire Brigdet Product is not flammable under normal conditions of use. It is hydrocarbon based and product will burn if preheated. Keep storage tarks, pipelines and fire exposed surfaces cool with waterspray. Explosion No information of product being explosive. Closed containers of the product may explode when exposed to extreme heat. Note Exacuse tarea and hoarby storage areas. Containers and nearby storage areas. 6. Accidental Release Measures Personnel must wear gloves, goggles or glasses, boots full length clothing during the cleaning procedure. If mists and vapours are involved an approved half face organic vapour/particulate respirator is required. Use respirators in accordance with all approtes (SCEA) when combatibilite area where possible. Contain applicage, then cover/absorb with non-combustible tabsorbal.	Acute	Ingestion or inhalation of vapours may lead to irritation of the mouth and respiratory tract. Ingestion may lead to nausea and diarrhoea. In the eye may lead to localised burning, redness and tears. Skin contact may lead to redness or itching.
Advice to Doctor Treat symptomatically as the product is hydrocarbon based. If vorniling has accurred after ingestion, the patient needs to be monitored to ensure the product has not been aspirated into the lungs. 5. Fire Fighting Metia Dry agent, carbon dioxide or foam. You can spray down furnes from fire using a water may/will cause splattering on hot residue as this product will float on water. Hazchem Code Nore Allocated Advice for Fire Brigade Product is not flammable under normal conditions of use. It is hydrocarbon based and product will float on water. Advice for Fire Brigade Product is not flammable under normal conditions of use. It is hydrocarbon based and product will subtraparay. Explosion No information of product being explosive. Closed containers of the product may explode when exposed to extreme heat. Note Evacuate area and contact menegency services. Toxic gases may evolve in a fire situation Remain upwind and notify those downwind of hazard. Waar full protective coloriance octainers and nearby storage areas. 6. For large spills prepare a bund/barrie ahead of the spill to contain the spill. If there is the possibility the spill to enter drains, storm water, sewer or waterways please make sure you bund the areas of concern. Make sure drains are covered to minimise the potential for this to occur.CleaningAfter spill contained, collect all spilled material and material used to clean up the spill in suitable containers. Follow local regulations for the disposal of waste. Personnel must wear gloves, goggles or glasses, boots full length clothing during the cleaning procedure. Wash contaminated area and equipment used to clean up in detergent and water after the spill has 		
 spillage Spillage Use personal protective equipment. Clear area of all unprotected personnel. Ventilate area where possible. Contain spillage, then cover/absorb with non-combustible absorbent material (vermiculite, sand, or similar), collect and place in suitable containers for disposal. In the event of a spill or accidental release notify the relevant authorities in accordance with all applicable regulations. Spillage & Environment Do not allow product to enter drains, surface water, sewer or watercourses please inform local authorities if this occurs. Contain the spill and absorb with absorbent material, sand or soil. For large spills prepare a bund/barrier ahead of the spill to contain the spill. If there is the possibility the spill to enter drains, storm water, sewer or watercourses please inform local authorities if this occurs. Contain the spill contained, collect all spilled material and material used to clean up the spill in suitable containers. Follow local regulations for the disposal of waste. Personnel must wear gloves, goggles or glasses, boots full length clothing during the cleaning procedure. Wash containnated area and equipment used to clean up in detergent and water after the spill has been cleaned up. Rinse area with water and don't allow the cleanup water to enter drains or water ways. 7. Storage and Handling Storage Storage are in a cool, dry, well ventilated area, removed from oxidising agents, acids, alkalis, heat or ignition sources and foodstuffs. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use. Check regularly for leaks or spills. Large storage areas should have appropriate fire protection systems. Store as a Class C4 Combustible Liquid (AS1940) Handling Before use, carefully read product label. Use of safe work practices are recommended to avoid eye or skin contact		
Spillagerespirator is required. Use respirators in accordance with standards AS 1715 and AS 1716. Use personal protective equipment. Clear area of all unprotected personnel. 8. Exposure Controls/Personal Protection

Exposure Standards

Ingredient	Reference	TWA		STEL	
Mineral Oil Mist	SWA (AUS)		5 mg/m3		mg/m3

Biological Limits No biological limit allocated. **Control Banding** No information available. Engineering Controls Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical extraction ventilation is recommended. Maintain vapour levels below the recommended exposure standard. **Individual Protection Measure** Eye & Face Protection Wear goggles/glasses and if there is a risk of splashing wear a full face shield. Use eye

protection in accordance with AS 1336 & AS 1337

Skin Protection Wear gloves. Nitrile rubber gloves are recommended. Wear long sleeved clothing to avoid skin contact. Soiled clothing should be washed properly with detergent prior to re-use Respiratory

Protection Not required during routine use. If mists or vapours are generated use an approved half face filter respirator suitable for organic vapours. Use in accordance with AS 1715 & AS 1716

Thermal Protection Not applicable

9. Physical and Chemical Properties

Appearance	Brown liquid
Odour	Characteristic odour
Odour Threshold	No data available
рН	Not applicable
Melting point/freezing point	No applicable
Initial boiling point	No data available
Boiling range	No data available
Flash point	Not applicable
Evaporation rate	No data available
Flammability (sold, gas)	No data available
Vapour Pressure (mmHg)	No data available
Vapour Density	No data available
Density (g/ml @ 15 °C)	0.8739
Solubility in water (g/L)	Insoluble in water
Partition coefficient (n-octanol/water)	No data available
Auto-ignition Temperature	No data available
Decomposition Temperature	No data available
Viscosity (cSt @ 40 °C)	Typically 116
Viscosity (cSt @ 100 °C)	Typically 15.71

10. Stability and Reactivity

Reactivity	This product does not pose any further reactivity hazards other than those listed below in Section 11.
Chemical Stability Conditions to Avoid	Stable under recommended conditions of storage and handling conditions. Heat, sparks, open flames and other ignition sources.
Materials to Avoid	Incompatible with oxidising agents (e.g. hypochlorites), acids (e.g. nitric acid), alkalis (e.g. hydroxides), heat and ignition sources
Hazardous Decomposition Products	May evolve into toxic gases (carbon oxides, hydrocarbons) when heated to decomposition.
Hazardous Reactions	Polymerization is not expected to occur
11. Toxicological Info	
Acute Toxicity	If swallowed this product is expected to have low toxicity. It may cause irritation to the mouth throat and digestive tract. Use safe work practices to avoid eye or skin contact and inhalation.
Skin corrosion/irritatio	
	Low irritant. Prolonged or repeated contact may result in mild irritation, rash and dermatitis. Correct handling procedures incorporating protective clothing and gloves should minimise the risk of skin irritation.
Serious eye damage/i	
	Low to moderate irritant. Contact may result in irritation, lacrimation, pain and redness. Symptoms may include localised burning, redness and tears. Correct handling procedures incorporating eye protection should minimise the risk of eye irritation.
Respiratory or skin se	
	This product is not expected to be a respiratory tract sensitiser based on known hazards of the products components. This product is not expected to be a skin sensitiser based on known hazards of the products components.
Germ Cell Mutagenici	
Carcinogenicity Reproductive Toxicity	Not expected to be a germ cell mutagen based on the assessment of components. Not expected to cause cancer. Based on the assessment of the components.
,	Not expected to be a reproductive hazard based on available data and the known hazards of the components.
Specific Target Organ	Toxicity (STOT) – Single Exposure
	This product is not expected to cause organ damage from single exposure, based on available data and known hazards of the components. This product is not expected to be an irritation hazard at ambient temperature under normal conditions. Not classified as a respiratory irritant, please note the inhalation of vapours or mist may cause irritation to the nose, throat and respiratory system.
Specific Target Organ	Toxicity (STOT) – Repeated Exposure
	This product is not expected to cause organ damage from Prolonged or repeated exposure, based on available data and known hazards of the components.
Aspiration Hazard	This product is not expected to be an aspiration hazard based on available data and the known hazards of its components. Note as the product is hydrocarbon based if vomiting has occurred after swallowing the person should be monitored for adverse effects.
Note	Used oils may contain harmful substances that can accumulate during use. All used oils should be handled with caution and skin contact should be avoided by wearing gloves made from nitrile rubber.

12. Ecological Information

12. Ecological Inform	nation		
Ecotoxicity	May be harmful to the aquatic environment. Mineral oils should not be released to waterways.		
	They can float on water, restricting oxygen exchange with possible asphyxiation of aquatic life.		
Persistence/Degrada			
- - - - - - - -	be inherently biodegradable, the product contains parts that may persist in the environment.		
Bioaccumulative Pote			
Mobility in soil	If the product enters the soil it is expected that it will absorb onto soil particles and will not be		
	mobile.		
Other Adverse Effects			
	is not expected to have ozone depletion potential, photochemical ozone creation potential or		
	global warming potential. The product is a mixture of non-volatile components, which are not		
	expected to be released into the air in any significant amounts.		
13. Disposal Consid	erations		
Disposal Methods			
Product	This product should not be released into the environment, any unused material should		
	be recycled where possible or disposed of as hazardous waste at an appropriate collection		
	depot. Dispose of in accordance with relevant government legislation.		
Containers	Empty containers may contain residual oil. Containers should be completely drained and stored		
	safely. Empty containers should be taken for recycling or disposal through suitably licensed		
contractors in accordance with government regulations.			
Note	Do not pressure, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame,		
	sparks, static electricity, or other sources of ignition. They may explode and cause		
	injury or death.		
	Local council and / or state environment authority may be able to provide advice on the		
	disposal of this product.		

14. Transport Information

This product is not regulated for land, sea or air transport.

Land Transport			Sea Transport	
Land (ADG Code)	Not applicable		SEA (IMDG Code)	Not applicable

15. Regulatory Information

Safety, Health and Environmental Regulations

Applicable Regulations	
SUSMP	Not scheduled
AICS	All ingredients are listed in the AICS list
Montreal Protocol: (Ozone depleting substances)	Not applicable
Stockholm Convention: (Persistent Organic Pollutants)	Not applicable
Rotterdam Convention: (Prior Informed Consent)	Not applicable
Basel Convention: (Hazardous Waste)	Not applicable
International Convention for the Prevention of Pollution from Ships (MARPOL)	Annex 1 Oil

GHS Classification Hazard Class & Category and	Not applicable
Hazard Statement	

HSNO Approval Number	Not applicable
HSNO Group Title	Not applicable

16. Other Information

Additional Information

The organic materials consist of paraffinic, naphthenic and aromatic oils.

MINERAL OILS - SOLVENT REFINED; Animal experiments and human experience have not shown cancer risks when handling solvent refined mineral oils, unlike non refined mineral oils.

CLEANING MINERAL OIL CONTAMINATED CLOTHING; Cleaners are advised that when cleaning oil contaminated clothing it is essential that freshly distilled solvent is used for each batch, including final rinse, as even filtered solvent will leave oil residues.

MINERAL OILS - USED; Used mineral oils in engine crankcases and other high temperature/high stress environments may contain potentially harmful residues, some of which have been shown to cause irreversible skin effects, including cancer. Prolonged and repeated inhalation of mists associated with used mineral oils may result in pulmonary fibrosis.

MINERAL OILS - INJECTION; Where high pressure applications are used the risk of accidental injection under the skin exists and may result in an extremely painful and serious injury requiring immediate medical attention. Depending on the pressure used, mineral oils may be injected a considerable distance below the skin and may cause permanent tissue damage. SEEK IMMEDIATE MEDICAL ATTENTION. EXERCISE EXTREME CARE WHEN USING HIGH PRESSURE EQUIPMENT.

ABBREVIATIONS: ADB - Air-Dry Basis. BEI - Biological Exposure Indice(s) CAS# - Chemical Abstract Service number - used to uniquely identify chemical compounds. CNS - Central Nervous System. EC No - European Community Number. IARC - International Agency for Research on Cancer. M - moles per litre, a unit of concentration. mg/m3 - Milligrams per cubic metre. NOS - Not Otherwise Specified. NTP - National Toxicology Program. OSHA - Occupational Safety and Health Administration. pH - relates to hydrogen ion concentration using a scale of 0 (high acidic) to 14 (highly alkaline). PPE – Personal Protection Equipment ppm - Parts Per Million. RTECS - Registry of Toxic Effects of Chemical Substances. TWA/ES - Time Weighted Average or Exposure Standard.

First issued: 18/10/2011 Revision Date: 16/02/2016

16. Other Information Cont.

HEALTH EFFECTS FROM EXPOSURE:

It should be noted that the effects from exposure to this product will depend on several factors including: frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a SDS which would encompass all possible scenarios, it is anticipated that the end user will assess the risks and apply control methods where appropriate.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:

The recommendation for protective equipment contained within this SDS is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered by the end user before final selection of personal protective equipment is made.

REPORT STATUS:

This SDS has been prepared by Tranzmile using the most current information available at the time of issuing. Tranzmile accepts no liability (as lawfully allowed) for any loss, injury or damage which may have been suffered or incurred by any person as a consequence of their reliance on information that is contained in this SDS.
