Warehouse ready for Summer

Workshops are cool and in control with Alemlube's premium evaporative air coolers

The powerful Alemlube cooling units are perfectly suited to warehouses and workshops where traditional cooling methods are impractical or cost prohibitive. Strong in performance, the new units generate an impressive high volume of airflow.

Evaporative coolers are an environmentally friendly and extremely energy efficient cooling method. They cool without the use of chemicals or refrigerants and with lower electricity usage. Delivering a natural cooling of water with a consistent breeze as they combine a variable airflow and water evaporation.

As the outside air blows through unit, the water is evaporated and the heat in the air is absorbed, lowering the air temperature. The fans will pick up the relative humidity of the day and adjust your water consumption while the fan settings are adjustable to meet your optimum conditions.

The polyethylene housing is sturdy being both rust and leak proof, with no upkeep required. Conveniently on wheels, the Alemlube evaporative coolers are designed for mobility and ease of use. A smart energy efficient system allowing control of workshop conditions.

NEW

AAPKA30

**ALEMLUBE AUTOMOTIVE PREMIUM
MOBILE EVAPORATIVE AIR COOLER**

\$2,040 RRP

- ✔ Suited to warehouses & workshops where traditional cooling methods are impractical or cost prohibitive
- ✔ Huge in performance & easy-to-operate producing up to 23,000 cubic metres of airflow per hour
- ✔ 240V 1,100W 3 speed motor
- ✔ Fan diameter is 76cm
- ✔ Maximum cooling area is 220sqm
- ✔ Dimensions are 112cm x 64cm x 160cm
- ✔ Fully mobile with sturdy lockable front wheels
